

13 – 15 BESSEMER CRESCENT AYLESBURY BUCKS. HP19 8TF UNITED KINGDOM  
TEL (44) (0) 1296-487075 FAX (44) (0) 1296-437005 WWW.STERLINGINT.COM

To: **All users of CityCrown CNC Aspheric Lathes**

From: CityCrown Limited (wholly owned subsidiary of Sterling Ultra Precision)

Subject: **Direct replacement of old type Servo Motor and Drive.**

In recent years availability of parts for the above replacement has been a problem for CityCrown CNC Aspheric machine users.

If your machine(s) are affected, we have developed, tested and successfully installed multiple replacements of the servo motor and drive on the Aspheric CNCs.

- \* No additional modifications are needed to the lathe (hardware or software)
- \* The majority of these replacement kits have so far been installed by the end users (Europe, Asia, Middle East).
- \* The kit is designed so that most of the existing connections are used.
- \* It includes full fitting instructions with a picture guide so that the customer can easily fit it themselves.
- \* Installation services are available (extra charge) if required.
